Contents

1 Layout of the Graphical User Interface (GUI) 9

2 Coordinate Systems 13
2.1 Coordinates of the Model (CS1) . . . 13
2.1.1 Further Components of the Model . . . 14
2.1.2 Floating Point Numbers or Fixed Point Numbers ? . . . 15
2.2 Coordinates of the Canvas (CS2) . . . 17
2.3 Coordinates of the Graphical User Interface (CS3) . . . 19

3 Key Figures and Terms 21
3.1 Scale and Paper Size . . . 21
3.2 Zoom-Factor . . . 22
3.2.1 Minimal and Maximal Zoom Factor . . . 22
3.2.2 Multiplier . . . 23
3.3 Objects . . . 24
3.3.1 Primitive Objects . . . 24
3.3.2 Complex Objects . . . 27
3.4 Drawing Frame and Title Block . . . 29
3.4.1 Modelling . . . 31
3.5 Bounding Box in General . . . 32
3.6 Bounding Box of the Model . . . 34
3.6.1 Dimensions of the Bounding Box . . . 35
3.6.2 Boundaries of the Bounding Box . . . 35
3.6.3 Position of the Bounding Box . . . 36
3.7 Base-Offset . . . 38
3.8 Initial Size of the Scrolled Window . . . 39
3.9 Visible Area of the Model . . . 41
3.10 Scrollbars . . . 42
3.11 Position of the Pointer (Mouse Pointer) . . . 43
3.12 Position of the Cursor . . . 43
3.13 Zoom Center . . . 44
3.14 Translate-Offset . . . 45

4 Conversions Between Coordinate Systems 47
4.1 Distances and Lengths Between CS1 and CS2 . . . 47
4.2 Conversions Between Real and Virtual Model Coordinates . . . 48
4.2.1 From Real to Virtual . . . 48
4.2.2 From Virtual to Real . . . 48
4.3 From Model to Canvas . . . 49
4.4 From Canvas to Model . . . 50

5 Initializing **51**
5.1 Computing the Bounding Box . . . 53
5.1.1 Details on the Computation . . . 55
5.2 Computing the Base-Offset . . . 60
5.2.1 Y-Axis . . . 60
5.2.2 X-Axis . . . 62
5.3 Scrollbars . . . 64
5.3.1 Vertical Scrollbar . . . 64
5.3.2 Horizontal Scrollbar . . . 66
5.4 Zoom To Fit . . . 68
5.4.1 Size Ratio of Scrolled Window to Rectangular Area . . . 69
5.4.2 Center Rectangular Area on Visible Area . . . 70
5.5 Dimensions of the Canvas . . . 72
5.5.1 Static Configuration . . . 72
5.5.2 Dynamic Configuration . . . 78

6 Operational Mode **81**
6.1 Zoom-To-Fit . . . 81
6.2 Zoom-To-Area . . . 82
6.2.1 Primary Area Selection in the Model . . . 83
6.2.2 Visualizing on the Canvas . . . 84
6.3 Computing the Translate-Offset While Zooming . . . 85
6.3.1 Canvas Point as Center . . . 86
6.3.2 Real Model Point as Center . . . 87
6.4 Changings of the Scrollbars While Zooming . . . 88
6.4.1 Horizontal Scrollbar . . . 91
6.4.2 Vertical Scrollbar . . . 92
6.5 Size of the Scrolled Window, Canvas and Scrollbars . . . 93
6.5.1 Detecting the Change of Size . . . 94
6.5.2 Restoring the Scrollbar Configuration . . . 94
6.5.3 Synchronization of Lower Edge of the Image with Scrolled Window . . . 95
6.5.4 Operation Modes of the View . . . 97
6.6 Drawing on the Canvas . . . 106
6.6.1 Computing the Visible Area . . . 107
6.6.2 Computing the Grid . . . 109
6.6.3 Drawing the Grid . . . 113
6.6.4 Drawing the Origin . . . 117
6.6.5 Drawing the Cursor . . . 117
6.6.6 Area Check . . . 118
6.6.7 Size Check . . . 120
6.6.8 Drawing Frame and Title Block . . . 121
6.6.9 Drawing Complex Objects . . . 122
6.6.10 Triggering the Redrawing . . . 125
6.6.11 Notes on GTK/Cairo Routines . . . 126

7 Drawing to Scale **127**
7.1 Entry Points . . . 130
7.1.1 Importing Design Files . . . 130
7.1.2 Converting the Drawing Grid . . . 131
7.2 Exit Points . . . 132

8 How to Use the Demo Programm 133
8.1 Navigation on the Canvas . . . 134
8.1.1 Moving the Scrolled Window . . . 134
8.1.2 Zooming In and Out . . . 134
8.1.3 Zoom To Fit . . . 134
8.1.4 Zoom To Area . . . 134
8.1.5 Cursor . . . 135

9 Source Code 137
9.1 Main File . . . 138
9.2 The Package demo_frame . . . 140
9.2.1 Specification . . . 140
9.2.2 Body . . . 142
9.3 The Package demo_objects . . . 145
9.3.1 Specification . . . 145
9.3.2 Body . . . 149
9.4 The Package demo_grid . . . 159
9.4.1 Specification . . . 159
9.4.2 Body . . . 162
9.5 The Package demo_canvas . . . 167
9.5.1 Specification . . . 167
9.5.2 Body . . . 169
9.6 The Package demo_bounding_box . . . 173
9.6.1 Specification . . . 173
9.6.2 Body . . . 175
9.7 The Package demo_base_offset . . . 180
9.7.1 Specification . . . 180
9.7.2 Body . . . 181
9.8 The Package demo_callbacks . . . 183
9.8.1 Specification . . . 183
9.8.2 Body . . . 188
9.9 The Package demo_main_window . . . 205
9.9.1 Specification . . . 205
9.9.2 Body . . . 206
9.10 The Package demo_scrolled_window . . . 208
9.10.1 Specification . . . 208
9.10.2 Body . . . 211
9.11 The Package demo_coordinates_display . . . 218
9.11.1 Specification . . . 218
9.11.2 Body . . . 220
9.12 The Package demo_zoom . . . 227
9.12.1 Specification . . . 227
9.12.2 Body . . . 231
9.13 The Package demo_visible_area . . . 236
9.13.1 Specification . . . 236
9.13.2 Body . . . 238
9.14 The Package demo_buttons . . . 241
9.14.1 Specification . . . 241
9.14.2 Body . . . 242
9.15 The Package demo_conversions . . . 244
9.15.1 Specification . . . 244

9.15.2 Body . . . 246
9.16 The Package demo_cursor . . . 249
9.16.1 Specification . . . 249
9.16.2 Body . . . 251
9.17 The Package demo_drawing_origin . . . 255
9.17.1 Specification . . . 255
9.17.2 Body . . . 256
9.18 The Package demo_geometry . . . 258
9.18.1 Specification . . . 258
9.18.2 Body . . . 261
9.19 The Package demo_logical_pixels . . . 266
9.19.1 Specification . . . 266
9.19.2 Body . . . 268
9.20 The Package demo_primitive_draw_ops . . . 270
9.20.1 Specification . . . 270
9.20.2 Body . . . 272
9.21 The Package demo_scale . . . 275
9.21.1 Specification . . . 275
9.21.2 Body . . . 277
9.22 The Package demo_translate_offset . . . 280
9.22.1 Specification . . . 280
9.23 The Package demo_visibility . . . 281
9.23.1 Specification . . . 281
9.23.2 Body . . . 282
9.24 The Package window_dimensions . . . 283
9.24.1 Specification . . . 283
9.24.2 Body . . . 284

10 Compiling and Executing the Demo Program 285
10.1 Downloading the Binary File . . . 285
10.1.1 System Requirements . . . 285
10.2 Compiling the Source Code . . . 286
10.2.1 System Requirements . . . 286
10.2.2 Compiling . . . 287
10.3 Launching the Binary File . . . 288

11 Miscellaneous 289
11.1 Why *Ada* ? . . . 289
11.2 Why GTK3 ? . . . 289
11.3 Why Version Control ? . . . 289
